Languages: JavaScript, SQL, PHP, Dart, HTML/CSS

Frameworks & Libraries: Flutter

Developer Tools: VS Code, GitHub, Git, Google Cloud Platform, Android Studio

Database & Web Technologies: MySQL, Supabase, PostgreSQL, Airtable

Experience

MIS Intern (Part-time)

Aug 2024 – Jan 2025

FACT Zimbabwe - Management of Information Systems Department

Mutare, Zimbabwe

- Assisted with data entry, validation and quality checks to ensure accuracy and consistency of program-related digital records.
- Aided in the management and maintenance of digital data collection and reporting platforms including the DHIS, KoboToolbox and Microsoft Excel to optimize data administration and reporting processes
- Provided technical support to staff by resolving system, software, and user-related issues.
- Assisted with ICT equipment setup, configuration, and troubleshooting including laptops, printers, tablets and other related office technology.
- Supported the compilation, organization, and preparation of M&E and MEAL reports through data consolidation, report formatting, and verification of program information from multiple sources.

Student Intern

July 2023 – June 2024

FACT Zimbabwe - Child Protection and Case Management Department

Mutare, Zimbabwe

- Streamlined inter-departmental workflows by serving as the primary technical bridge between the CPCCM department and other teams, the MEAL and MIS included.
- Managed caseload of child protection cases, conducted assessments and developed care plans for orphans and vulnerable children.
- Captured, analyzed, visualized case data through the utilization of data analysis tools (Excel and DHIS) to identify trends in child protection cases and informing targeted interventions and resource allocation.
- Oversaw aspects of digital documentation from content creation to data visualizations and info-graphics design while maintaining confidentiality and adhering to ethical guidelines.
- Report writing and relaying information to relevant departments.

Data Clerk (Relief)

Dec 2019 – August 2021

FACT Zimbabwe - Monitoring, Evaluation and Research Department

Mutare, Zimbabwe

- Digitized qualitative and quantitative field data using DHIS system.
- Performed data entry and validation checks to maintain data integrity for routine program reports.
- Made use of key program indicators to generate visual summaries for the MER staff for performance monitoring and assessment.

Projects

WindowShopper | [🌐 https://wndwshpr.github.io](https://wndwshpr.github.io)

November 2025 - Present

- Developed and currently maintaining a cross-platform mobile application using Flutter and Dart that enables users to discover local stores, compare prices, track shopping lists, and access real-time product information with an intuitive, user-friendly interface.
- Designed and implemented a robust backend infrastructure using Supabase with PostgreSQL, featuring secure authentication (email/password and OAuth), Row Level Security (RLS) policies, real-time database synchronization, and cloud storage for product images with automatic optimization.
- Built a full-featured store management system allowing vendors to manage inventory, track sales analytics, handle product listings.

- Designed and deployed WSUploader, a standalone web application for bulk product management using vanilla JavaScript, enabling store owners to import hundreds of products via CSV/Excel files with real-time validation, progress tracking, and error handling.
- Implemented an Admin Panel with comprehensive CRUD operations for user management, store approval workflows, content moderation, system-wide maintenance mode controls, and analytics dashboard for monitoring platform activity and user engagement.
- Integrated advanced features including geolocation-based store and product discovery.

AU Social Work Platform | [🌐 https://ausocialwork.netlify.app](https://ausocialwork.netlify.app) **June 2025**

- Developed a comprehensive web platform for Africa University Social Work alumni and current students using HTML, CSS, JavaScript, and Supabase for backend ensuring a clean, clear, and user-friendly experience optimized for responsiveness.
- Leveraged Supabase to implement secure user authentication, real-time database functionality for a dynamic Forum and a searchable Alumni/Student Directory significantly enhancing user engagement.
- Designed and integrated content modules for a Blog/News section, Events Calendar (for webinars and gatherings), Gallery, and Project Showcase as well as core functionalities for professional development that includes, a responsive Job & Internship Board, a structured Mentorship Program, and a curated Resource Library.
- Built an intuitive Admin Panel atop Supabase services for comprehensive CRUD operations and data management (user profiles, content, job listings), as well as system configuration (user roles, feature toggles) and monitoring.

Anonymous Feedback Application (FACT Zimbabwe) | [🌐 https://cpcmchannel.netlify.app](https://cpcmchannel.netlify.app) **January 2024**

- Developed a secure feedback platform with Javascript and integrated Appscript API to load all the feedback in a clear and structured spreadsheet which only the department supervisor can access.
- Enabled anonymous reporting as well as streamlined and encouraged departmental feedback.

Certificates

Introduction to Cloud Computing **Oct 2023**
IBM (on Coursera) *Online*

JavaScript Algorithms and Data Structures **Aug 2023**
freeCodeCamp *Online*

Responsive Web Design **June 2019**
freeCodeCamp *Online*

Additional Experience

Social Media Manager (📷 @aubasketball) **2022 – 2025**
Basketball Team *Africa University*

- Launched and managed the team's official Instagram account, establishing its digital presence from the ground up.
- Created visual content including photography, videography, and graphic design, using Adobe Creative Cloud tools (Premiere Pro, Photoshop, Lightroom, Illustrator) and mobile apps such as VN, InShot, Picsart, and Snapseed.
- Designed team kits that visually aligned with the team's brand and image.
